

ABB monitoring and communications Plant Viewer for Mobile

Plant Viewer for Mobile give solar power plant owners a flexible and cost solution for monitoring their solar power systems on the go.

With Plant Viewer for Mobile, existing Aurora Vision users such as Plant Portfolio Manager users or Plant Viewer users can track their solar power system production using the IOS/Android smart phone or tablet of their choice.

Accessing Plant Viewer for Mobile is as easy as 123:

1. Install Plant Viewer for Mobile app from the Apple Store (for apple devices) or Google Play (for Android devices).
2. Login to your newly installed application using your user Aurora Vision or EasyView user account and password.
3. View your Solar System's energy production on the smart phone or tablet of your choice!

Highlights

- Get access to existing solar power systems you can see using your current Plant Portfolio Manager or Plant Viewer user login account
- No need to choose between using a PC web browser and your favorite mobile device. You can use both options ... simultaneously
- Meets future mobile device power plant monitoring needs using any Aurora Vision logger with ABB micro, string, and central inverters
- Works with solar power systems self registered by homeowners

Additional Highlights

- See current and past energy generation values to track energy production over the life of one or more plants
- Mail yourself detailed energy information for further investigation
- Displays weather information from weather stations installed at the solar power plant site
- Works on IOS and Android devices that support IOS 7.x and Android 4.x

Support and service

ABB supports its customers with dedicated, global service organization in more than 60 countries and strong regional and national technical partner networks providing complete range of life cycle services.
