

YOUR SOLARWORLD ADDED VALUE AT A GLANCE

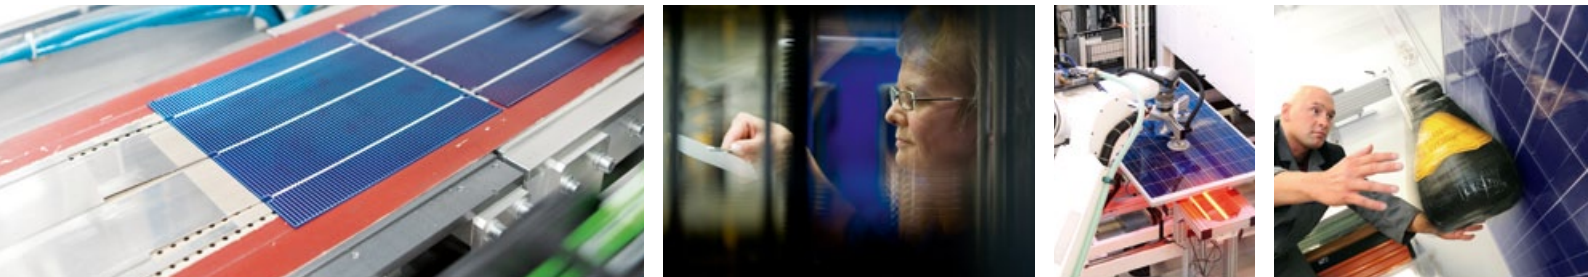

A solar power system is much like any other investment: Only those who invest in quality can expect reliable returns.

- » We are committed to a sustainable energy supply for over 35 years.
- » Quality is the defining feature for all of our products.
- » German quality standards, comprehensive quality assurance, and extensive product testing allow us to provide both maximum investment security and performance.
- » With our diverse range of products, we provide tailor-made system solutions for any application.
- » All from a single source.

From planning and installation, to decades of operation of the SolarWorld solar power system, customers can rely on our industry expertise and SolarWorld's added value.

We turn sunlight into power.

Quality is measurable: We constantly test the quality of our products. Various independent test facilities regularly award us top marks.

Made in Germany – We produce our quality products in Germany and the United States, both centres of excellence for solar technology

PV+Test – The outstanding workmanship and the temperature and low-light performance of our Sunmodule Plus SW 245 poly were rated as “excellent” by PV+Test.

TUV “Power controlled” – Regular tests by TÜV Rheinland guarantee that our solar modules maintain the rated outputs.

GREEN BRAND – SolarWorld AG was the first company in the solar industry to be awarded the ‘GREEN BRAND’ seal of approval. The certificate is only awarded to brands which have been proven to practise environmental sustainability.

35 years of expertise – As a PV pioneer, we have been producing top quality for over 35 years with expertise and passion, focused on crystalline solar power technology from the beginning.

Best protection – Whether free system insurances or real-time yield monitoring, we offer many additional services that safeguard the smooth operation of solar power systems.

Optimal system solutions – With our diverse range of products, we offer system solutions for all solar energy applications. But we never rest on our laurels with our technical developments. Instead, we equip you perfectly for the future, today.

The most customer-friendly guarantees – We provide long-term security: linear performance warranty of 25 years for the Sunmodule series, linear performance warranty of 30 years for our glas-glas module Sunmodule Protect, a 10-year product workmanship warranty, and a number of other guarantees on quality and service.

Comprehensive tests – Intensive tests that greatly exceed international standards are the key to our holistic approach to quality assurance. In this way we ensure that only premium quality products leave our factories

A strong partner – Personal service, professional PV plant design, guaranteed quality. We offer everything you would expect from a reliable partner.

We turn sunlight into power.
